Subject: Notification per PRN 98-10 – Adding restriction for use on ants of public health concern
Product Name: Bonide Garden Dust
EPA Registration Number: 4-473
Application Date: 10/27/2017
Decision Number: 535383

Dear Ms. Horton:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, you may contact Lisa Pahel at (703) 347-0459 or via email at pahel.lisa@epa.gov.

Sincerely,

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Environmental Hazards

This pesticide is toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions

Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift. Do not allow adults, children, or pets to enter the treated area until dusts have settled. Do not water the treated area to the point of runoff. Do not make applications during rain.

STORAGE & DISPOSAL

Pesticide Storage: Store and transport in an upright position. Store in a cool, secure, dry area inaccessible to children or pets.

Pesticide Disposal: *If partly filled* – Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Container Handling: *If empty* – Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

Not for use on crops grown for resale.

BONIDE® GARDEN DUST is a specially formulated insecticide and fungicide designed for convenient use as a dust, colored green to blend with foliage.

DIRECTIONS FOR HOME GARDEN USE:

Shake container to fluff powder. Cover both tops and undersides of leaves with thin uniform film of dust. Depending on foliage density, 10 oz. will cover approximately 625 sq. ft. [1 lb. will cover approximately 1000 sq. ft. / 4 lb. will cover approximately 4000 sq. ft.]

Start applying when plants leaf out in the Spring before insects and diseases appear, as it is easier to prevent than cure certain diseases. Try to hit as many insects as possible. Best results are obtained in early morning or evening when wind is calm. Avoid use during high temperatures on plants susceptible to sulfur injury, such as melons, squash, cucumbers and pumpkins. Repeat treatment every 7 to 10 days, as needed. Do not apply to food crops within one day of harvest.
